HARDY HERBACEOUS PLANTS

For
BORDER AND ROCK GARDEN

NEW THINGS THIS YEAR

This list is printed as a supplement to my list of last year. Herein you will find a record of the new species and varieties added to my nursery since the spring of 1928. Most of these are choice and rare rock garden plants.

In addition to these I am growing other new things from seed. From the Alps, the Rocky Mountains, the Pacific Northwest, England and New England are coming seeds or plants to my collection. There is something new every time you come out.

Last summer was a good growing season. I have larger stocks of many items than ever before. The weather fates have been good this past winter.

As spring opens, I'll be on hand each evening from four on to darkness, and all day Saturday to greet you. Whether you are in need of plants or just want to browse around and gossip, you are welcome.

Drive north of Worthington on High Street one mile to Wilson Road, turn west 1000 feet and my place is the second house on the north side, a colonial brick. Drive in and if I'm not in sight, look for the old dinner bell.

"If the gardener you fail to see—
Ring the bell right lustilee."

HARRY R. O'BRIEN
